

AUTOMATED EXTERNAL DEFIBRILLATOR

Description:

Cardiac Arrest is one of the biggest killers in this country. Many of these victims could have been saved by use of an Automated External Defibrillator (AED). This very practical course will allow delegates to use the AED competently. The course also re-addresses some basic First Aid skills including resuscitation.

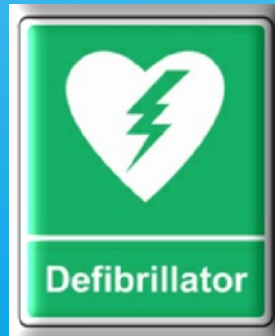

Course Duration:

A minimum of 6 hours of mostly, practical training.

Syllabus:

A range of subjects is covered including:

- * Assessment of the situation * Dealing with an unresponsive casualty
 - * Heart Attacks * Resuscitation * Chain of Survival * AED Safety measures
 - * AED Maintenance * AED Use * Scenario Training ...& more.
- we will also tailor the training to your specific work
Risks and environment.

Certification:

There is a formal assessment at the start of the day to ensure delegates can resuscitate correctly. There will also be an assessment at the end of the course to ensure all can use the AED in a safe, prompt and effective manner. Successful delegates will be issued with a 1 year qualification.

Numbers:

A maximum of 8 students can attend this course and must be a minimum of 16 years of age.

Location:

We can deliver this training at your place of work, reducing disruption and cost in regards to time out and travelling
