

# Resuscitation Flow Chart (Paediatric)

**Danger**

**Response**

**Shout 4 Help**

**Airway**

**Normal Breathing**

**yes**

1. Conduct Secondary Assessment
2. Place in Recovery Position
3. Call Emergency Services
4. Monitor Casualty

**no**

**Start CPR  
5 Breaths first  
then 30 to 2**

1. If you are on your own, conduct CPR for 1 minute, call 999/112 for emergency services, continue CPR.

2. Conduct CPR – 30 Chest compressions and then 2 rescue breaths. Continue this rate of 30-2 .

3. If you have help, start CPR immediately whilst your helper calls 999/112 .

4. If your helper can assist with CPR, change over every 1-2 mins to prevent fatigue

6. If you are unable to conduct rescue breaths, continue with chest compressions only

5. Continue CPR until emergency services arrive, your casualty starts breathing normally or you can no longer continue
