Resuscitation Flow Chart (Paediatric)

Start CPR
5 Breaths first then 30 to 2

Normal Breathing

Dangers
Response
Shout 4 Help
Airway

1. Conduct Secondary Assessment
2. Place in Recovery Position
3. Call Emergency Services
4. Monitor Casualty

1. If your on your own, conduct CPR for 1 minute, call 999/112 for emergency services, continue CPR.

2. Conduct CPR – 30 Chest compressions and then 2 rescue breaths. Continue this rate of 30-2.

3. If you have help, start CPR immediately whilst your helper calls 999/112.

4. If your helper can assist with CPR, change over every 1-2 mins to prevent fatigue

5. Continue CPR until emergency services arrive, your casualty starts breathing normally or you can no longer continue

6. If you are unable to conduct rescue breaths, continue with chest compressions only
